

GLACIER PARK MODELS

“O” SCALE 2-6-6-2

TANK MALLETS

Tank locomotives are a very important part of a railroad's rich history. With that being said, we felt it was time to recreate these magnificent beauties in model form using today's level of technology in the brass model field.

We're proud to announce several very distinctive versions that will entice the Logging modelers and collectors alike. Pay close attention to the photo descriptions. Once again we are only building a limited number of models, so get your reservations in early to avoid disappointment. P-48 Kits will be offered to those who desire to convert theirs over to Proto 48.

Early 2014 delivery
